# Translation B

Okay, buckle up buttercup, because Uncle AI is about to give you a *word-by-word* translation of this bureaucratic mumbo jumbo! Prepare for hilarity:

## The Big Grain Gigglefest!

**A Top Secret Order (Not Really)**

From the all-powerful Council of Bean Counters (aka The Government) dated August 1st, 2024 - Number 2042-R

Big Announcement! The government's decided to let folks sell up to 500,000 tons of wheat from their secret stash (the "Interventional Fund" – sounds kinda shady, right?). They even signed a fancy document about it. Apparently, this will keep the grocery shelves stocked and prices sane...or at least that's what they say!

**Wheat-Worthy Words:**

This wheat was bought up back in 2014-2016 and again in 2022-2024 when the price crashed. Now, it's going to be auctioned off on the "Stock Market" thingy for folks inside the country (no foreign buyers allowed!).

The minimum sell price will be...well, at least as high as what they paid for it originally! No haggling below that line!

**Here's How This Whole Grain Game Works:**

This fancy "Interventional Fund" is basically where the government stores stuff when prices dip. They buy up the goods, keep 'em safe in their warehouse, and then sell them off later when prices rise again. Think of it like a giant money-making scheme!

**The Price Hike Plan:**

When those wheat prices start going up, they open the floodgates and release some of this stored wheat to keep everyone from panicking! Genius, right?

***spread eagle lying in blood, fist choking ball and rod, swallowing George's old tale***

**A VERY OFFICIAL NOTE FROM THE BIG BOSSES (WITH LOTS OF CAPITAL LETTERS!)**:

**THE GOVERNMENT DECREES...**

- 1. Give permission for selling up to 500,000 tons of wheat from the "Interventional Fund" this year!
- 2. Make sure that only certain companies approved by a bunch of ministers (don't ask which ones) can buy this wheat!
- 3. Tell them to sell it on an exchange called a "stock market" and make them charge at least the amount they paid for it in the first place! No stealing profits here folks!
- 4. When they sell it, send all the money to the government except for what they need to pay off debts and taxes - after all, everyone's gotta get their cut right?
- 5. Make sure there's enough money in the budget to pay the special agents who are selling this wheat!

**Signed (with a fancy signature that probably cost a fortune),**

**Mikhail Mishustin (aka the Head Honcho of the Grain Game)**
